# Module ICT3715

Practical System 2024

Online Bus Registration System

More feedback on Assessment 1

1. Complete the Plagiarism Pledge (page 2). Your Assessment (assignment) will not be assessed without this

2. Follow and complete all the instructions

3. Do not change the format of the template of your assessment

4. Make sure that the sizes of the diagrams are user friendly, meaning you have to be able to read the information in the diagrams

5. All software must be free and not a trial version

6. You have to references sources that you are using [see the plagiarism pledge at number 10], even the software that you will be using for backup and recovery, software that you will be using to draw the ERD's, etc.

7. Make corrections on assessment 1 after receiving feedback and the general feedback send to students in your assessment 2

8. You have to give your system a name [added in the header of the assessments document]

9. If you are using logo's and or pictures you have to reference them

10. Your assessments must be a professional document

11. You may only select from the databases presented, if you want to use any other databases you had to acquire approval from the lecturer (per e-mail) and you have to enclose the e-mail in your assessment as evidence

12. You may only select from the programming languages presented, if you want to use any other programming language you had to acquire approval from the lecturer (per e-mail) and you have to enclose the e-mail in your assessment as evidence

13. Do not cancel the application of a learner if there is not space available on the bus, the system must place the learner automatically on the waiting list

14. Refer to the Activity Diagram in the Assessment 1 General Feedback document

    a. Use the example as a guideline to correct or improve your own activity diagram, you do not have to change your activity diagram to the example provided

15. Refer to ERD in the Assessment 1 General Feedback document

a. Use the example as a guideline to correct or improve your own ERD diagram, you do not have to change your ERD diagram to the example provided
